Project:

Contract Value: Approx. £400,000.00

Scope of Works

The Wales Velothon is a challenging 140km or 50km cycle ride through some of Wales' most breath-taking scenery. In 2015 up to 15,000 riders took part in the completely closed road event embarking from the heart of Cardiff passing through various cities and counties such as Newport, Pontypool & Caerphilly.

Due to unforeseen circumstances, RTS were only given instruction to carry out preparation for the event approximately 6 weeks prior. This left RTS with the momentous task of having to create almost 2500 bi-lingual chapter 8 and special legend signs as well as produce 300+ traffic management plans to reflect the closures that will be installed on the day – it seemed an almost impossible task.

As well as the mere size of the event, RTS were reasonably unfamiliar to the area of which the event took place. This meant that a greater allocation of time and resources were made available to ensure the event was carried out and managed seamlessly.

The fantastic feedback received – from this event more than most – left a huge sense of achievement with everyone involved as it really exhibited the scale at which RTS can undertake mass participation events.

The Wales Velothon 2016 date is TBC.
