

# A LEADING LIGHT IN **TRAFFIC MANAGEMENT**

**OUR MISSION** at Road Traffic Solutions is to establish a market leading organisation that offers an exceptional service at a fair and competitive price. Maintaining a passion for the task in hand throughout and upholding the fundamental values of our business, we strive for continued development.

**OUR SERVICE.** For us, it's all about the quality. Delivering a faultless, effective and professional service in a prompt and punctual manner each and every time.

**OUR CUSTOMERS** are the reason we do what we do. Building long lasting relationships through exceptional service, forward thinking and anticipation of the customer needs will always remain fundamental principles within our business.

**OUR VALUES.** We operate our business ethically and have a passion for fairness, honesty and integrity. We believe in transparency throughout.

**OUR EMPLOYEES.** Our business. Our family. From day one we have always believed in giving people an opportunity. Developing throughout, promoting from within and leading from the top. Our team, created from a wealth of diversity and experience, breeds success and ensures the continued progression of our company and the service it provides.

## ABOUT US

Road Traffic Solutions (RTS) became a limited company in January 2004 and over a decade down the line we have established ourselves as one of the leading lights within the traffic management industry.

Due to the ever increasing workload, RTS now operate from six depots strategically based throughout the country. Our Head Office is in Scunthorpe ( North Lincolnshire) with our satellite depots located in Alvechurch (Midlands), Grays (East London), Bury St. Edmunds (Suffolk), Rickmansworth (North West London) and Cumbernauld (Scotland). We cover anywhere within the UK and pride ourselves on a very reliable and professional service.

We are unique within the industry in the way that we operate a two hour call out response to anywhere within the UK. This is to allow us to cover all last minute orders, emergency visits and time sensitive off hires. Operational 24 hours a day / 365 days a year, RTS provide their clients with this emergency service. As part of this service we have a designated senior manager on top of our out of hours team to allow instantaneous responses to any given situation.

Currently servicing contracts both large and small within the construction, utility, mobile access, census and filming industries to mention only a few, RTS are fully aware of what requirements are involved on each and every particular job.

# TRAFFIC MANAGEMENT SYSTEMS

Whether a crane is required on the highway, a pot-hole needs re-surfacing or maintenance is urgently needed on a gas pipe; there is a Traffic & Pedestrian Solution.

Road Traffic Solutions have a reliable and hands-on team who put the client first. Our estimators will put forward a competitive quotation to accommodate today's climate but by no stretch of the imagination does this mean we cut any corners. All of our operatives are fully qualified and carry numerous years of experience meaning you are always in the most capable of hands.

- Road Closure & Diversion
- Contraflow System
- Priority Systems
- Convoy Systems
- High Speed Lane Closures
- Multi-phase Temporary Traffic & Pedestrian Light Systems
- Lane Closure
- Stop & Go
- Give & Take
- Survey Systems
- Pedestrian Management

# IN-HOUSE SIGN MAKING FACILITY

Road Traffic Solutions have the luxury of creating all of our special legend signs with our own sign making facility.

All signs are created in compliance with The Traffic Signs Regulations and General Directions manual, ensuring council approval and that the sign carries out its purpose.

This service is beneficial in the following circumstances;

- Producing advance warning signs
- Site specific diversion signs
- Various event management signage

# IMPACT PROTECTION VEHICLE (IPV)

Road Traffic Solutions implement safe and knowledgeable Traffic Management scenarios on any motorway or high speed dual carriageway thanks to our fleet of Impact Protection Vehicles.

Our competent and experienced teams provide guidance, support and professional installation/removal of complex schemes complying with the National Highways Sector Scheme 12A,B,D including 12A Foreman, 12B LTMO & TSCO including 24 hour maintenance.

# TEMPORARY TRACK WAY

Due to the high demand in Cherry Picker operations off the highway, Road Traffic Solutions have invested time and money to provide a temporary track way service that can withstand up to 32 tonnes of weight.

## BARRIERS, BLOCKS & FENCING

Barriers, blocks and fencing are key within the Traffic Management industry when keeping both the work force and pedestrians safe from potential hazards. Road Traffic Solutions provide the following variants;

### Plastic Pedestrian Barriers

Used to define a work area and guide pedestrians around the works safely. They are lightweight but stable and have a reflective strip for high visibility. In addition to these we have plastic ramps for wheelchair access.

### Heras Fencing

6 foot high metal fencing is more often than not incorporated into jobs with heavy machinery. They come complete with clips that ensure panels cannot be moved or tampered with without specific tools. We also provide sound reducing fencing products which absorb sound within noisy environments.

### Strongwall Barriers

Strongwall Barrier is a very stable barrier designed to withstand a stumbling pedestrian in order to protect them from vehicles and deep excavations.

### Crowd Control Barrier

Fixed foot pedestrian barriers that are 2.3m wide by 1.2m high. These barriers are ideal for segregating crowds from your event area.

### Heavy Duty Water Filled Blocks

With an excellent impact resistance, water filled blocks are occasionally preferred on long term projects due to their stability.

### High Speed Traffic Barriers

Road Traffic Solutions have worked on numerous traffic management projects utilising Steel Vehicle Barriers/ Concrete Blocks. RTS can provide temporary and fully anchored permanent applications. N2 W2, N2 W5 & H2 W8 containment.

## VMS SIGNS

Variable Message Signs (VMS) are used to support our Traffic Management layouts within major schemes and high profile works. They help raise awareness of the job at hand therefore helping to create a safer traffic solution.

Available in full colour and with the highest quality LEDs, the VMS work hand in hand at sporting events and festivals providing an attractive alternative to road signs.

Only minimal effort is required when changing wording thanks to wireless control via laptop or SMS text messaging.

## TEMPORARY TRAFFIC LIGHT & PEDESTRIAN LIGHT SYSTEMS

Road Traffic Solutions have an impressive fleet of over 300 Temporary Traffic & Pedestrian Light heads. All lights are battery operated and have a minimum battery life of a week. Control panels on the traffic light heads enable the lights to be manually controlled if required. Alternatively they can be remote controlled from a distance in order to give the operative an alternative, perhaps more beneficial view of the site.

Our Traffic Lights boast the following qualities;

- Easy to use and simple to operate.
- Guaranteed 300m operating distance between signal heads.
- Capable of multi-phase set-ups of up to eight phases.
- Can be set to either fixed timings, vehicle actuated or manually controlled.

## REPS (ROAD TRAFFIC SOLUTIONS EFFECTIVE PROFESSIONAL SERVICE)

REPS is our purpose built bespoke system to help streamline our processes and keep us ahead of the competition. To ensure its success RTS invested two years and significant costs to develop and test the new software, which launched in February 2016.

Although this system is highly innovative, to us, it is still in its infancy. We own this software fully, which gives us the option to develop and expand REPS even more; further cementing our place as market leaders.

REPS can be seen as the internal hub of the company, which plays a fundamental role in allowing our team

to input any job at any given time, with perfect clarity. Furthermore, we have the facility that once the jobs are confirmed they can be allocated and sent straight to the operatives on their handheld PDAs. Subsequently, our operatives can then see the traffic management plans, associated permissions and the required bill of materials required for each task allocated to them. Once the jobs are implemented on site and photos are taken, they then appear on the windows system in the office, typically within 20 minutes. The system boasts further facilities too, such as being fully integrated with Sage, meaning that invoicing can also be completed using REPS.

We also offer a customer portal. This facility allows the customer to check that their jobs are booked in and view the completion report showing signatures and full photos of all the sites. This can be logged into via our website upon receipt of a username and password.

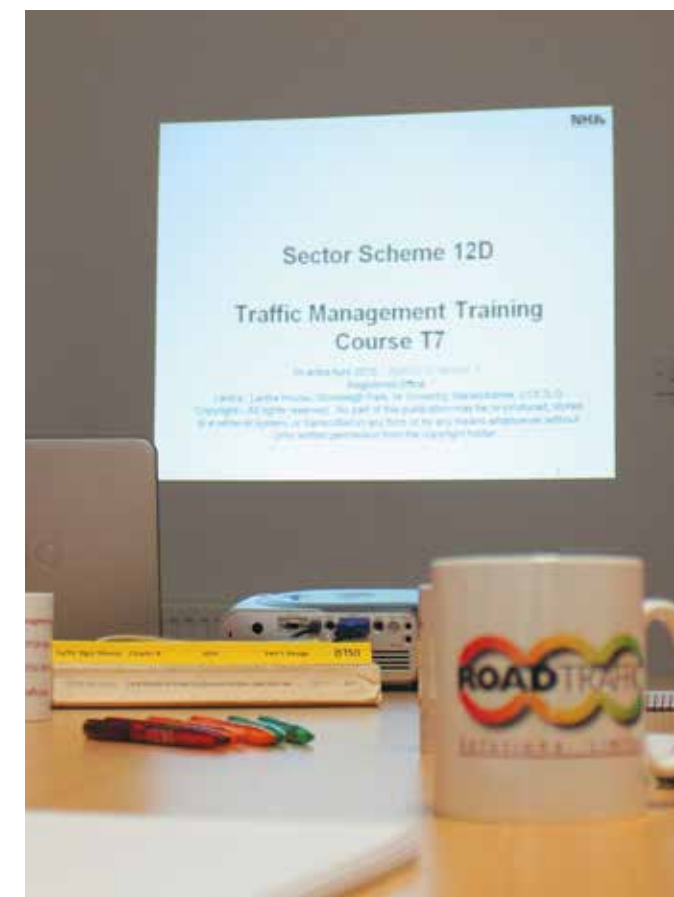

## TRAINING/SHEQ

We operate a fully accredited NHSS training centre in Scunthorpe, North Lincolnshire to be able to deliver all aspects of 12 A/B and 12 D training. In order to monitor our employees' high standards of work on site, in-house audits are periodically carried out and recorded on all traffic management scenarios. We also provide City & Guilds signing, lighting and guarding qualifications.

We remain focused on minimising our carbon footprint as a company. Paperless office systems, the use of recycled products and a continued investment in energy efficient alternatives are just some of the things we do to assist in the environment.

Clients include Metropolitan Police, Westminster City Council, The AA Signs, Transport for London and various Local Authorities across the UK.

## TABLETS (PDA)

All operations staff at Road Traffic Solutions are issued with a Personal Data Assistant (PDA) which is directly linked to our internal bespoke system - REPS. This is designed specifically to minimise paperwork and maximise efficiency.

## DESIGN & CONSULTATION

Since being established in 2004, our Project Co-ordinators have cemented fantastic relationships within every council authority throughout the UK. With jobs ranging from crane operations to film sets, our staff are among the most experienced and knowledgeable within the industry.

### Council Consultation

Road Traffic Solutions can apply for 99% of Council Permissions on the client's behalf and will do so if requested, including paying for the permissions upfront. These include;

- Temporary Traffic Regulation Orders (TTROs)
- Crane Licenses
- Cherry Picker Licenses
- Parking Bay Suspensions
- Traffic Signal Switch Out
- Bus Stop Suspensions
- Dispensations

### Traffic Management Plans

Road Traffic Solutions supply over 7,000 Traffic Management and Event Management Plans a year. As a company we take a lot of pride into designing and producing our plans and this has been appreciated in the form of constant praise from our clients.

We use the latest edition of BricsCAD V15 and Cone 10 in order to stay ahead of the competition. Although our plans are always easy to understand and attractive on the eye, they show immense detail and various measurements to ensure client and council approval. We can download Ordnance Survey Tiles for anywhere within the UK. We can also design and complete a vehicle **swept path analysis** in-house.

### Site Meeting & Surveys

Our site surveyors travel the UK to assess up-and-coming jobs, often meeting the client on site to give them an understanding of what Traffic Management will be required.

Once on site they will record all measurements, speed limits, site visibility, potential disruption of local services and traffic flow. This is all sent through our surveyor's handheld tablet direct to our head office where we will produce BricsCAD Traffic Management Plans and Traffic Management Quotation if required.

### Streetworks/ETON Notices

Always striving to offer our clients with the definitive traffic management package, Road Traffic Solutions have a fully experienced and trained team to process the ETON (Electronic Transfer of Notices). The notices are managed from start to finish, with full liaison and a good working relationship with local authorities built up over our 12 years of trading. Our team will ensure your permits are granted as quickly and smoothly as possible.
