

Our Company

Road Traffic Solutions is an expanding and progressive business that have been operating since 2004. We provide a number of services all over the country from Traffic and Event Management on some of the UK's most prestigious Mass Participation Events to Access Solutions and Site CCTV.

Our Role

As a Traffic Management CAD Technician, you will be required to produce 2D CAD Drawings for various Traffic Management situations for clients and locations all over the country. We maintain a very high standard with our Traffic Management Plans and pride ourselves on the quality, accuracy and attention to detail that our plans provide. With the existing progression structure in place, you will be trained, supported and developed to fulfil your role become a valuable member of the team.

Key Responsibilities

You will work within a team to produce 2D CAD drawings to a Chapter 8 Standard utilising Bricscad and Cone Software. Scenarios will include but are not limited to Portable Traffic Signals, Road Closures, Lane Closures, Stop/Go and Priority Systems.

You will liaise with various departments within the company as well as our clients and local authorities to ensure that the traffic management scenarios devised are safe and suitable as well as giving updates on progress.

You will be well organised, motivated and show initiative whilst being able to work to set timescales. You should show great aptitude for teamwork, communicating well with colleagues to ensure that department and client KPIs are met.
